DoHoT or Donion aka "DoHoT 2 Handle"

Performance of Anonymous DNS Queries

Jonathan, Tom, Tor, Alfred

Introduction

Anonymous Queries

- **Proxy between Client and Resolver**
  - Oblivious DNS
  - Oblivious DNS-over-HTTPS (ODoH)
  - DNS-over-HTTPS-over-Tor (DoHoT)

Goal: change configurations and compare performance

- Identify parameters
- Create containers for protocols
- Measure latency: `DNSHACKATHON-{random}.se`

Introduction

Anonymous Queries

- Proxy between Client and Resolver
    - Oblivious DNS
    - Oblivious DNS-over-HTTPS (ODoH)
    - DNS-over-HTTPS-over-Tor (DoHoT)

Goal: change configurations and compare performance

- Identify parameters
- Create containers for protocols
- Measure latency: `DNSHACKATHON-{random}.se`

Protocols

Default DoHoT: Client → Entry → Middle → Exit → DoH Resolver

Idea 1: Client → Nearby Entry → Nearby Exit → DoH/DoT Resolver

Idea 2: Client → Nearby Entry → Nearby Exit Resolver

- Normal DNS (Do53)
- DNS-over-HTTPS (DoH)
- DNS-over-TLS (DoT)

- DNS-over-Tor (DoTor)
- DoH-over-Tor (DoHoT)
- DoT-over-Tor (DoToT)

Protocols

Default DoHoT: Client $\rightarrow$ Entry $\rightarrow$ Middle $\rightarrow$ Exit $\rightarrow$ DoH Resolver

Idea 1: Client $\rightarrow$ Nearby Entry $\rightarrow$ Nearby Exit $\rightarrow$ DoH/DoT Resolver

Idea 2: Client $\rightarrow$ Nearby Entry $\rightarrow$ Nearby Exit Resolver

- Normal DNS (Do53)
- DNS-over-HTTPS (DoH)
- DNS-over-TLS (DoT)

- DNS-over-Tor (DoTor)
- DoH-over-Tor (DoHoT)
- DoT-over-Tor (DoToT)

Protocols

Default DoHoT: Client → Entry → Middle → Exit → DoH Resolver

Idea 1: Client → Nearby Entry → Nearby Exit → DoH/DoT Resolver

Idea 2: Client → Nearby Entry → Nearby Exit Resolver

- Normal DNS (Do53)
- DNS-over-HTTPS (DoH)
- DNS-over-TLS (DoT)

- DNS-over-Tor (DoTor)
- DoH-over-Tor (DoHoT)
- DoT-over-Tor (DoToT)

Protocols

Default DoHoT: Client → Entry → Middle → Exit → DoH Resolver

Idea 1: Client → Nearby Entry → Nearby Exit → DoH/DoT Resolver

Idea 2: Client → Nearby Entry → Nearby Exit Resolver

- Normal DNS (Do53)
- DNS-over-HTTPS (DoH)
- DNS-over-TLS (DoT)

- DNS-over-Tor (DoTor)
- DoH-over-Tor (DoHoT)
- DoT-over-Tor (DoToT)

Protocols

Default DoHoT: Client $\rightarrow$ Entry $\rightarrow$ Middle $\rightarrow$ Exit $\rightarrow$ DoH Resolver

Idea 1: Client $\rightarrow$ Nearby Entry $\rightarrow$ Nearby Exit $\rightarrow$ DoH/DoT Resolver

Idea 2: Client $\rightarrow$ Nearby Entry $\rightarrow$ Nearby Exit Resolver

- Normal DNS (Do53)
- DNS-over-HTTPS (DoH)
- DNS-over-TLS (DoT)

- DNS-over-Tor (DoTor)
- DoH-over-Tor (DoHoT)
- DoT-over-Tor (DoToT)

Measurement
